

Ain't broke, don't need fixing...
Forgive my grammer, but that about sums up this nonissue. Sat radio is the future and I really enjoy it. Broadcast radio around this location is virtually all Clear Channel owned. Sat Radio provides a badly needed alternative.

Please take no action to "protect" broadcast radio. They can change to meet the competition or go the way of the dinosaur.

If you want to take some action, make Clear Channel sell some stations!
